◆ DESIGNER & WEB DESIGNER

Websites · Landing Pages · Social Media · AI-powered creative workflow

Profile

Designer and web designer since 2021. I create websites, landing pages and visual content that help businesses stand out online, from Figma layout to WordPress launch, with a focus on responsive design, user experience and conversion. Currently a Mid-level Designer at V4 Company, a Brazilian growth marketing agency, working with companies that invest in paid media. I use generative AI daily to create and retouch images and move faster without compromising on finish.

Experience

Mid-level Designer
Jan 2026 – Present

V4 Company · Goiânia, on-site

- Websites and landing pages focused on UI/UX and conversion (CRO), built in WordPress and page builders.
- Social media, ad creatives and visual identity aligned with paid media campaigns, working with the Growth team.
- Supporting around 20 accounts across healthcare, retail, food & beverage, construction and services.
- **AI in production:** creating and retouching images, short videos and pages with Claude, Magnific and v0, including Black November campaigns and an online offers flyer.
